SKILLS

- React
- HTML5
- CSS
- Javascript

- Python
- REST API
- Java
- Git

- Linux
- Figma
- jQuery
- Cloud Deployment

PROJECTS

Half-Time – July 2020   **Full Stack** – Ottawa, ON

- Backend (Routing and Database), Front End (Some UX/UI)
- React, mongoDB, Mongoose, Express, Auth0, Various REST API

Half-Time is a fantasy soccer application, and general soccer news/information hub. It allows users to select players from a roster comprised of the top national teams, with player cards in the style of the FIFA video game series. Players can then customize team names, logos, formations, and battle other user's teams.

Github Repository   github.com/diegolehyt/half-time

Live Deploy   Under construction (migrating from mLab to Atlas)

UFC Roster – July 2020   **Front End** – Ottawa, ON

- Front End
- React, React.Bootstrap, Express

UFC Roster (or employee-directory) is a quick and simple search/sort single page application that allows users to search through a partial UFC roster. The goal of the project was to implement live search functionality; as the user types, the results are filtered out.
